

MATCH YOUR HOME'S STYLE WITH THE RIGHT DOOR HARDWARE

How to Complement Your Home's Style with Door Hardware –
A guide to coordinating the right BHMA certified lockset

Traditional Style

This classic, European style focuses on comfort, familiarity, and romanticism that commonly includes symmetrical details like shutters or columns.

Choose bright silver or gold chrome handle sets with elegant curves to enhance the home's classic charm.

Contemporary Style

With simple yet clean lines and sophisticated modern shapes, these homes often feature large windows, flat or low-pitched roofs, and minimalist designs with a masculine edge.

Look for modern keyless or smart lock options with satin nickel or matte black finishes to complement the home's bold aesthetic.

Rustic Style

Influenced by the American craftsman style, rustic homes emphasize warmth, raw, and organic materials featuring exposed wooden beams, stone accents, and earthy tones.

Find lockset styles that pair well with the natural feel of the home such as aged bronze, antique brass, or distressed nickel/gold handle set or knobs.

No matter your home's style, always look for the **BHMA Certified Secure Home** label when shopping for a lockset. These products have been rigorously tested and rated for security, finish, and durability. For more information, visit www.securehome.org
